Dear Mr Goff

**RE: FOOTPATH MAP**

We have surveyed our footpaths and note two anomalies that may confuse visiting walkers. These are marked on the attached map in green. We would be grateful if the footpath map could be corrected in due course.

The anomalies are:

**Footpath W5/7:**

The actual path diverges from the map 200m S off Walditch Road, by the stables, and rises diagonally to the right to join a track that follows the contour line towards Sadness Copse. This is marked in green on the attached map. The mapped path rises very steeply through a patch of bracken and brambles and cannot be seen.

**Footpath W5/21:**

The actual path diverges from the map when it leaves the permissive path at Bottom Wood and rises directly north to the ridge where it joins W5/2. This is also marked green on the attached map. The mapped path follows the contour to the left and joins W5/2 to the West. It has long been obliterated by brambles and gorse.

If you require any further information, please do not hesitate to contact me.

Yours sincerely,

A J Basker  
Chairman
